Release information

Harmony Release

- Feature 22742 - Show all languages if function VisaAllaSprak is true (Customer specific)
- Feature 22732 - TMS-Consignor:
It is possible to transfer the original freight option of an invoice (order) to a registered exchange order. This is managed by settings in the TMS-solution of Harmony.

Bug fixes & Minor Adjustments

- ECS-1417 - Duplicate receipt numbers (Store)
Double clicks (or repeated clicks) on the Print button in the Cashpoint screen occasionally creates wrong receipt number (added by 1). We have now made adjustments and only accept one click per receipt.
- Feature 23046 - When a customer has many invoices and/or store receipts it is now possible to see them all in the Invoice/Overview of Harmony, a paging functionality in the actual display.
- ECS-3477 - The setting on user level to Set focus in the "barcode field" at the stock item search now also affects the order item search.
- ECS-3396 - Adjustment in Transaction respons handling from Klarna

Harmony Desktop Client

- Update is required.
