Release information

Harmony Release Features

- Feature 23833 - TMS nShift (Consignor):**
 When doing a retrial in the call for "creating shipments" we are now deleting the information about the originally chosen droppoint Id.
 This is done for making it more possible for the retrial attempt to be successful.
- Feature 22170 - Account number without BIC**
 It is now possible to register account number for refund without registration of BIC-code in Germany - Postbank. Customer Specific Solution.
- Feature 22513 – Valitive**
 Search by Social Security Number (SSN) and customer address monitoring via Valitive (Decidas)
 - 1) EC is implementing the new API-solution from Valitive for search by SSN in Sweden, Norway and Finland.
 - 2) EC Is also implementing the API-monitoring possibility from Vaitive for Swedish address data.
 Both services are add on modules in Harmony and they also require a separate agreement (contract) with Valitive

Minor adjustments & Bug fixes

- **ECS-1691 – GDPR Consent**
If a customer (CnaNr) had consent in several Sales Channels, only consents in the Sales Channel where a consent expired were before considered.
Thus, a customer could be deactivated even if he had a valid consent in another Sales Channel.
We have now solved this by taking into account consents independent of the Sales Channel. Deactivation of customer is X-ning of Name, address, etc.
The name and address are common to a CnaNr. However, only consents marked with "Deactivation customer" are taken into account.
However, we have provided information to the Companies that have more than 100 Customers (CnaNr) with Consent in several Sales Channel."
- **ECS-4080 Order text Consignor**
Adjustment of ordertext button colour in the invoice display. Text with type "TMS Droppoint" will indicate with colour yellow instead of green.

Harmony Desktop Client

- Reload of Harmony for a new version is required.
