

Release date: 2023-02-14

## Harmony Released Features

- **Feature 19256/ ECS-8576 Prioritized Activity type**

This activity type rules over all other activity types that already exist in Harmony.

If a customer is directed to an activity that has this activity type, the customer's order will be linked to this activity in all situations.

This activity type is useful in cases where you want to be able to control the accounting down to posting accounts in the sales and inventory accounting.

It is then possible to connect the activities to your own financial activities. Can be useful in, for example, wholesale sales channels.

Configuration by EC is required. If interested please contact Evolution Commerce.

### Minor adjustments

- **Feature 25966 Ecrion - Split print files by number:**

Possibility to split large invoice files for printing in smaller files, containing only maximum X invoices. Picking trolleys will never be split.

This functionality was released 2023-01-17 and now there is an adjustment/correction made.

### Harmony Desktop Client

- Reload of Harmony for a new version is required.

### Important information Release May 9 2023

We intend to terminate an older service we see no longer fulfills any function.

The service refers to our handling of Offline transactions.

The service was set up primarily to handle Offline transactions in connection with our previous major weekend releases. As the vast majority of our customers have their own offline management at their websites and our release procedure has changed this service does not fulfill any function with us.

We intend to end the service in connection with the release on **May 9** and we urge you to secure your own offline solutions with your Web partner.

More information about Offline Handling can be found in our document [The web service methods](#)

For questions, contact Harmony Support.
