

Release date: 2023-03-14

Harmony Released Features

- ECS-10043/Feature 26456 Convert return labels created by nShift from ZPL (ZPLGK) to .PNG**
Possibility to convert ZPL-labels to PNG-labels in the integration between nShift and Harmony.
Customer specific development.
- ECS-9555/Feature 26030 Storage/Stock balance detail changes:**
#1: Harmony is now showing all connected stock locations for a SKU, even if the balance is zero. Conditions are that the stock position type is "30 - Picking stock (Balance)" or "31 - Picking stock (Pallet)".
If there is no balance for the SKU in the explicit location and there is only a connection, the location is marked with "yellow-button" to indicate that.
There will also be a possibility to adjust the balance for this connected location and it is also possible to connect the SKU to another location with the existing functionality to "Move balance to another location".. The only thing that happens is that there will be a change of the connected stock locations for the SKU if the moved balance is zero. No stock transactions are created.
#2: The stock location "VIRTUELL" will not be shown anymore if the balance in that location is zero.
- ECS-10391/Feature 26671 TMS Integration nShift – Parameter SubmitShipment for package volume delivery**
Parameter setting: If the shipment volume that is sent to nShift is based on the item dimensions or the selected packing material (emballage). Default value is the packing material.
- ECS-9550/Feature 26034**
A new process for connecting a certain fixed stock location to defined new SKU's automatically.
Customer specific development.

Minor adjustments

- ECS-10571** E-invoice Reference number and Goods marking. New special development regarding E-invoices for certain companies.

Harmony Desktop Client

- Reload of Harmony for a new version is required.
