Minor adjustments & Bug fixes

- Feature 24413 Payment External part - Rounding off logic**
 Adjustment in logic for rounding away from zero for payments to external partners.
- Feature 23061 Gift card (Store)**
 Corrections in the Store configuration for Gift card parameters
- Feature 24430 Improved validation in the Order execution, Item control**
 To minimize stops in the Order execution we have improved validation of Item numbers. If an item number is missing on an order the order will be excepted In the execution and Instead be sent to the Signal display for your correction.
- Feature 24494 Customer specific development in WMS-integration with NYCE.LOGIC:**
 Validate of existing Product line before sending item transaction to NYCE.LOGIC

1 (2)

Mark uncompleted delivery controls as finished when a goods receipt transaction from NYCE.LOGIC is handled in Harmony.

- **Feature 24091 Customer specific development in WMS-integration with NYCE.LOGIC:**
We have added the possibility to exclude Selling Channels through a parameter regarding the file ShowInvoice to external WMS.
- **Feature 24089 Customer specific development in WMS-integration with NYCE.LOGIC:**
We have made it possible, through a parameter, to use stock transaction with a code (parameter) to automatically add stock to an stockid and calculate the average cost price on the receiving stock id.
- **Feature 23992 Valitive**
Adjustments for house number, additional address and function availability In Store.

Harmony Desktop Client

- Harmony desktop is updated and reload of Harmony for a new version is required.
