Release date: 2023-05-09

Harmoney Released Features

ECS-3395/Feature 23246:
- Parameter for not sending Member number to Voyado.
- We have added a parameter for not sending Harmoneys customer number as Member number to Voyado.

ECS-11052/Feature 27271:
- Harmoney has a process for validation of the due date for gift cards before processing an order batch. There is a bugfix in this routine in the release.

ECS-9550/Feature 26034:
- Small change in the process logic for connecting specific stock location to new SKUs. We now check 90 days back, without considering the last batch process date.

ECS-10689/Feature 26962:
- The limitation of number of colors (attribute1) that are shown on the Item Display has been changed.
- Now the number of shown colors are unlimited.

ECS-8242/Feature 25357:
- Harmoney POS-solution: Upgrade of the integration for payment terminals with Nets (Baxi) to version 1.11.3.0.

Minor adjustments

ECS 11103
- Bug fix regarding the Online report.
  It was a problem when the user switched between pages.

ECS 10865
- Adjustment in solution to retrieve ocr number and minimum amount at Avarda. Stop code on customer orders changed from "Stopped due to payment card" to "Wait for response from Avarda".

ECS 11116

- Bug fix regarding the Stock balance display tab Stock balance - detail. Incorrect parcel-id could occur when moving balance from Stock pos. type Parcel to Balance in certain situations.

Harmoney Desktop Client

- Reload of Harmoney for a new version is required.
