

Release date: 2023-05-23

Harmoney Released Features

ECS-9878 / Feature 26822:

- Block code updates from Valitive have now been supplemented with logic that makes block code that have the "Deactivate customer" property perform customer deactivation ie put XXX in name, address, etc.

ECS-6968 / Feature 24721:

(This change concerns companies which are using the nShift - solution in Harmoney):

- EC has made more improvements in the TMS-integration with nShift. We have made some automatic error handling in the order batches, which makes us actually produce invoices for those sales channels which are under the limit for accepted error labels and the invoices for the sales channels which are above the limit will automatically be stopped.

The invoices which are stopped will be displayed as signals in the signal display of Harmoney:

Ägärdad	Kömgång	Försäljningskanal	Id	Text	Information	B...	Datum	Uppl.datum	Ägärdad datum	Av

- The invoices which are stopped can later on be reprocessed to nShift and also printed at the warehouse, via a special process that you can order by yourselves.
- This new batch for reprocess is called "PXXTMSOM" and is ordered via Harmoney "Execute order".
- You have to put in some parameters when ordering this process.

If you have further questions for this change, please contact Harmoney support.

Minor adjustments

ECS 11250

- Some bug fixes regarding the dropdowns on the online reports.

ECS 11081 (In Production since 2023-05-16)

- In-store deliveries will get a departure date after our changes.

Harmony Desktop Client

- Reload of Harmony for a new version is required.
